(M/F/D) - BG-P/MO

[APPLY WITH YOUR CV AND COVERING LETTER INDICATING THE POSITION ABOVE BY SENDING YOUR APPLICATION TO RECRUITING@BUGATTI.COM](#)

REQUIREMENTS

- Degree in engineering, industrial engineering or mechanical engineering
- An affinity for the automotive world would be a plus

SKILLS

- Fluent in English and French, German would be a plus
- Mechanical design and use of 3D software (3D experience software used)
- Knowledge of engraving and laser cutting methods
- Good knowledge of Excel, Power Query and Power-BI
- Knowledge of low-code and database applications
- Demonstrate rigour and confidentiality
- Good communication and organisational skills

TASKS

- Participate in planning the integration of new projects into production, focusing on processes.
- Help to launch and roll out a new digital platform for monitoring and planning production, training operators and reporting problems for follow-up.
- Identify the necessary KPIs, carrying out reporting and drawing up the specifications for future modules of the platform.
- Integrate process data into the new digital platform, monitoring prototypes and their production, and providing reporting support.
- Create and structure a lessons learned database for the planning department, and designing specific tools for launching new models, including writing equipment specifications and producing 3D printing and LASER engraving tools.
- Start up a laser engraving machine, produce signage for the site, continually improve the production workshop and processes, and create business cases to help decision-making.
